

# VENTIS

# FOREVER FIREPLACE

## COMPLETE STAINLESS STEEL CONSTRUCTION

- Competitor boxes use galvanized metals.
- 304 stainless steel grate is resistant to degrading due to heat.

## A HIGHER, SLOPED SMOKE CHAMBER

- Gradual slope reduces turbulence and evacuates smoke from the firebox more efficiently.
- No smoke spills from the fire chamber.

## SMALLER THAN THE FIREBOXES IT WILL BE REPLACING

- No need to cut out existing framing to make room for the Forever Fireplace.

## COMPLETELY SMOOTH BOTTOM

- No fastener heads to scratch homeowner's floors during installation.

## FULLY INSULATED

- A fully insulated firebox results in superior heat radiation.

## APPROVED WITH VENTED OR NON-VENTED GAS LOGS

- A simple conversion allows for the use of vented or non-vented gas logs.

## 1/2" CLEARANCE TO BACK AND SIDES OF FIREBOX, 0" CLEARANCE TO THE TOP OF STANDOFFS AND BOTTOM OF THE FIREBOX

- Minimal clearances allow for placement in smaller cavities.

## LISTED TO UL-127

- The rigorous UL testing and listing requirements assure consistent quality in materials and manufacturing standards.

## 8" CLASS A VENTING

- For use with 8" Class A Venting Ventis® Class A All-Fuel Chimney System.
